

# HOPE & INSPIRED WILL

*Sri Anish*

MESSAGE FOR 2021

2020 has been a huge wakeup call, to wake us up from deep slumber of; sense of separation, I-me-myself, disrespecting life, destroying nature and acting god. This has led to catastrophic events in recent past and we cannot predict any glorious future either, UNLESS — we are willing to expand our perception and change our direction.

2021 is not just a new year, but a new era. It is the beginning of a great chance, a great renaissance of sorts and for the first time in human history...

**'TIME IS LOOKING AT US WITH HOPE'**

Hope for our sanity, healing, growth & awakening

As collective humanity, we have the necessary intelligence & tools to decode these clear cosmic messages and re-calibrate our existence on Earth.

## FIVE PROFOUND MESSAGES

Here are the 5 messages which can change the 'future course of Humanity'

1

**ONENESS**  
Ego divides, Heart unites

Be aware not to entertain any thought, influence or impulse that divides and creates a sense of separation. *For ego dwells in separation and heart rejoices in union.*

We are all part of nature and not separate from it, so live as naturally as possible. *Nature will heal & nurture your being.*

And it is time to expand the boundaries of your family – be inclusive – *inclusiveness leads to joy (which we all are looking for)*

2

**INNER HARMONY:**  
Way for Outer Harmony

Bring your thoughts, words & actions into perfect harmony. This inner harmony creates a way for outer harmony. *Happiness follows this harmony—always*

3

**ECO SYSTEM**  
Invest in building a community

We need a strong eco-system to uplift individual and collective consciousness. Let this community be our extended family. *This conscious community will be our nourishing support*

4

**EMBRACE DIVERSITY**  
It makes Life beautiful

Diversity is the beauty of nature, without it life becomes dull—colourless. Embrace this diversity across all life forms; and at all levels—physical, psychological, ideological and spiritual. *Human consciousness expands in diversity*

5

**CELEBRATE LIFE**  
we all come with an expiry date

Life's law is abundance. We can create abundance of self created misery or abundance of love, wisdom and celebration. We cannot push our expiry date, so let's choose wisely and use every little opportunity to *celebrate life and be awakened*

@sri\_anish  @saadho\_saadho  
@sri.anish  @saadhosangha

With this, I hope you will allow your inner Agni (fire) to be ignited by the supreme will and play your part well

Your own awakening will create a whole new awakened humanity

Love and Prayers

*Sri Anish*
